Radiator  
Collection

# Glass Radiators

## Towelrads are proud to introduce Vetro, their new range of glass radiators.

Combining elegant frameless design with innovative technology, the Vetro radiator is a must have for any room in your home.

Our glass radiators produce energy-efficient heat through the use of Infrared technology, reaching set temperatures within 5 minutes.

Compared to convector heaters which warm the air, infrared heat is absorbed by surfaces, objects and people allowing the heat to be retained within the room as well as keeping dust and bacteria to a minimum.

Each radiator is made from shatterproof 10mm laminated toughened safety glass (UN12600-IB1) which provides complete peace of mind.

Each radiator comes complete with a fitting guide and hidden adjustable safety wall brackets\* for discreet, fast and simple installation.

### Vetro Horizontal

Ideal as a direct replacement of an existing panel radiator, the Vetro Horizontal range has been produced in accurate replacement sizes to ensure a fast and simple installation.

Each radiator delivers an equivalent heat output to a single panel compact radiator.

*Please pay close attention to the installation instructions. The bottom two brackets to be left loose to allow for product expansion.*

\*manufactured to German Norm VEDE6035.

### Electric Range

- Touch screen control includes illuminated pre-programmed settings for ease of use.
- Wireless remote control is included for easy 7 day timer programming.
- An antifreeze setting that protects the room from falling below 5 – 7 °C, plus a useful drying function which switches the unit on at a pre-set time of 2 hours.
- Suitable for use within zone 2 makes them perfect for use within bathrooms and wet rooms.
- Infrared heat, which is absorbed by surfaces.

### Wet System

- Our patented glass radiators are 100% environmentally friendly and made entirely from recycled materials.
- Efficient and economical to run through the use of an Aluminium heat exchanger resulting in the ability to adapt quickly to changes in temperature and the reduction of time for heating and cooling.
- Corrosion resistant and tested to twice the average bar pressure used in a standard home.
- High heat output up to 90 °C.
- Incorporates standard plumbing fittings for an easy installation into an existing or new central heating system.

# Vetro Glass Electric

Can be hung vertically or horizontally.

## Features and Benefits

- Remote 24 hour-7 day week timer
- Fixes close to wall
- IPX4 Rated
- Room temperature setting
- Touch screen
- Infrared technology
- Open window function
